

RMA Tracker Documentation Library

Master Documentation Outline

Version 2.1.1

This master outline consolidates all four documentation volumes into a single reference for the RMA Tracker Documentation Library.

Volume I – Software Requirements Specification (SRS)

- 1. Introduction
- 2. Overall Description
- 3. Functional Requirements
- 4. External Interface Requirements
- 5. Nonfunctional Requirements
- 6. Data Requirements
- 7. Business Rules
- 8. Use Cases
- 9. Future Enhancements
- 10. Acceptance Criteria
- 11. Glossary
- 12. Appendices

Volume II – Technical Design & Architecture Manual

- 1. Introduction
- 2. Architecture Overview
- 3. Project Structure
- 4. Technology Stack and Dependencies
- 5. Database Design
- 6. Class and Package Documentation
- 7. User Interface Design
- 8. Reporting System
- 9. Backup and Recovery System
- 10. Packaging and Distribution
- 11. Testing Strategy and Quality Assurance
- 12. Security, Reliability, and Performance Design
- 13. Maintenance and Future Architecture
- 14. Appendices

Volume III – User Manual & Administration Guide

- 1. Introduction
- 2. Getting Started
- 3. Creating and Managing RMAs
- 4. Viewing and Editing RMAs
- 5. Searching and Filtering
- 6. Status and Workflow Management
- 7. Reports, Printing, and Print Preview
- 8. Exporting Data
- 9. Backup and Restore
- 10. Application Administration
- 11. Troubleshooting
- 12. Frequently Asked Questions (FAQ)
- 13. Best Practices
- 14. Appendices

Volume IV – Installation, Deployment & Maintenance Guide

- 1. Introduction
- 2. System Requirements
- 3. Installation
- 4. Configuration
- 5. Building the Application
- 6. Packaging and Distribution
- 7. Deployment
- 8. Backup and Recovery
- 9. Maintenance
- 10. Troubleshooting
- 11. Developer Release Process
- 12. Security and Data Protection
- 13. Best Practices
- 14. Appendices

Complete Documentation Library

The complete documentation library consists of four complementary manuals:

- Volume I defines what the software must do.
- Volume II explains how the software is designed and implemented.
- Volume III explains how to use and administer the application.
- Volume IV documents installation, deployment, maintenance, and long-term support.
