EDUCATION

Old Dominion University, Norfolk, VA – Bachelors of Science in Computer Science, 2025

University of Kentucky, Lexington, KY – Bachelors of Business Administration in Marketing, 2016

PROJECTS

Rogue-Like Algebra | Godot, Rust

- Developing an educational rogue-like game that combines algebra problem-solving with RPG combat mechanics.
- Implementing gameplay features using object-oriented programming principles and version control with Git.
- Collaborating within an Agile development environment to manage project milestones and feature development.

Election Equipment Label Generator | Java

- Designed and developed a Java application that automatically generates voting machine labels from county election plans.
- Automated PDF label creation and formatting, reducing manual processing time and improving accuracy.

Election Inventory Management System | Java

- Developed a Java-based inventory reporting application to calculate and track voting equipment counts by county and machine type.
- Generated structured Excel reports for operational planning and equipment management.

Election Scheduling Calendar Generator | Java, Apache POI, iCalendar

- Developed a Java application using Apache POI to parse Excel schedules and generate iCalendar (.ics) files for automated technician scheduling.
- Automated technician assignment parsing using Apache POI and Java date/time APIs.

EXPERIENCE

Voting Machine Technician, Harp Enterprises; Lexington, ky – 2019- present

- Configured and deployed hardware-software integrated systems used in local and state elections.

- Diagnosed and resolved software, firmware, and hardware issues in mission-critical election environments.
- Performed system testing, validation, troubleshooting, and operational support across multiple voting locations.

Executive Assistant, Paris/Bourbon County Economic Development Authority; Paris, KY– 2015-2019
